

When it's urgent....
Call 911 Leak Services, Inc.

... when you have roofing leaks
... when you have waterproofing issues
... when you need to track roof history.

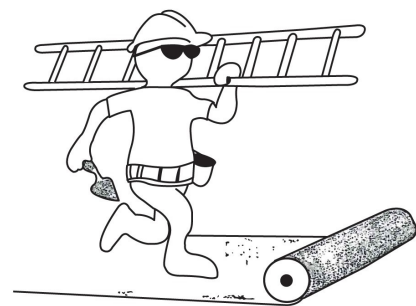

You have questions...

Our experienced technicians have the answers to your roofing service needs...

911 Leak Services, Inc. provides our clients and technicians with 21st Century technology to report, track, and update leak call information via the web from a desktop, laptop, tablet, or smart phone.

The client interface allows clients to report and track leak information, review proposals, review invoices, review digital CAD drawings of facilities, and review other archived roof-related documents for their facility or multiple facilities 24 hours, 7 days, 365 days per year.

Call us:

855-FXA-LEAK

Serving Michigan and surrounding areas.

Our Process

Emergency Leak Response

Clients and contractors can report a leak via the secured tracking interface.

Dispatch

The online service automatically sends confirmation email to the client, while also simultaneously sending emails and texts to central office, field supervisor, and pre-assigned technicians notifying everyone of pending leak call(s).

Contractor Updates

Once on site, contractors can do the emergency leak repairs, make recommendations, and update job information via the database.

Information Upload

Once all data is gathered, including photos, drawings, and leak/project information, this information is uploaded into the database archives for roof history referencing.

Electronic Drawing Updates

Experienced CAD technicians regularly update leak call and project activity for client and field technician referencing.
